- + Consistent quality - Every product goes through stringent quality control testing
- + Market leading - The highest quality fabrics & componentry made to last in Australia's harsh climate

Select Install Options

The location of your awning is a key factor in selecting the range & style. Our wide variety means that we have the perfect solution for every location.

When you are choosing your awning the most important factors to consider are its functionality & how the system can be adapted to the requirements of its location.

Options Include

- + Windows
- + Balconies & terraces
- + Patios & pergolas
- + Sliding doors & entrances
- + Pool areas

Key Benefits

- + Reflects heat
- + Keeps interiors cool
- + Reduces energy costs

Things To Consider

There are several things to consider when choosing the right awning and Blind for your location:

- + The orientation of the sun & how much shade you require.
- + The awning projection when fully opened this varies & is determined by which system you choose.
- + The colour & finishes on your awning. We have an extensive colour range that will compliment any exterior space.
- + Choose an awning that can fit your dimensions perfectly to be the most effective.
- + The weight of the awning is also important, so we always ensure it is installed where it does not exceed the load-bearing capacity of the wall.

Window Awnings

Window Awnings

Keep the sun & heat out of your home with our Window awnings installed on your windows.

Our window awnings are the ultimate product for protection against the harsh Australian sun. Reducing sunlight & glare on your windows they offer protection for the inside of your home from sun damage & greatly improve your home's energy efficiency.

High quality window awnings will greatly improve your home's energy efficiency. Fabrics are available which block & reflect up to 95% of solar energy before it reaches the window, resulting in keeping your house cool, saving you energy & money.

Durable & practical, adjustable or retractable awnings can be rolled up in the winter to let the sun warm your house.

Zipscreen Awnings

EASY OPERATION

Instantly open or close depending on the sun's direction

Alfresco Awnings

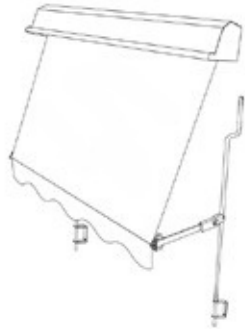

Select Window Awning Style

Design smarts & timeless style with our window awnings. No matter what shape or size window, with us you can personalise the perfect awning to suit your external shading requirements & location. Our window awning styles include our automatic, fixed guide & straight drop awnings.

AUTOMATIC

Traditional window awning ideal for ground floor windows. Spring operation.

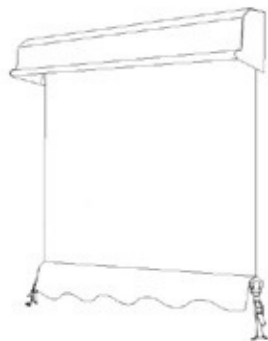

FIXED GUIDE

Traditional window awning for harder to reach windows. Preferred window awning for when motorised operation is chosen. Can also be spring or manual crank operation.

STRAIGHT DROP

A window or alfresco awning. Perfect when posts, pillars or walls are not available for the installation of guides. Spring, manual crank or motorised operation.

CLIMATE CONTROL

Our automatic awnings block & reflect solar energy before it reaches your window

Automatic Window Awning

Want to shade your windows from & keep's the hot sun further from the direct sunlight, without losing out façade increasing your homes energy on fresh air & breezes? Then our efficiency. This projection also allows automatic window awning is for you. The window to be able to be opened to let fresh air or breezes in to cool.

The automatic window awning is fixed your home to the wall & when in the dropped position allows airflow between the When retracted the fabric is protected fabric & window.

The slanted design year round by our powder coated sits out from the base of the window, steel hoods that can be coordinated to inviting breezes while maintaining match the colour of any home's façade.

Privacy & sun, heat & UV protection.

The use of longer arms that increase the awnings angled projection from the window provides a larger air pocket so the awning works more efficiently.

Automatic Window Awning

Perfect performance, year after year, thanks to our mouldings, imported from the engineering industry, revered for its outstanding strength & longevity.

Despite the name this Awning isn't actually motorised. Its name comes from the clever automatic locking mechanism it has. Shade your windows from direct sunlight, with the Automatic Window Awning. Ideal for ground floor locations.

Fixed Guide Window Awning

If you would like to motorize your window awning then our fixed guide style is for you.

Fixed guide window awnings are an ideal outdoor awning for homes with higher, hard to reach windows as they can be operated not only with our spring operation but also using our manual crank or our motorized operation so you can operate your awnings with the touch of a button from inside your home.

In the same way as the automatic window awning, the fixed guide window awnings shade your windows from direct sunlight, without losing out on fresh air & breezes.

Fixed guide window awnings are mounted to the wall & when in the dropped position allows airflow between the fabric & window. The slanted design sits out from the base of the window, inviting breezes while maintaining privacy & sun, heat & UV protection.

The angled projection of the awning from the window provides a larger air pocket so the awning works more efficiently & keeps the hot sun further from the façade increasing your home's energy efficiency. This projection also allows the window

To be able to be opened to let fresh air or breezes in to cool your home.

When retracted the fabric is protected year round by our powder coated steel hoods that can be coordinated to match the colour of any homes façade.

Straight Drop Window Awning

Straight drop window awnings are a traditional awning style that uses no guides making it ideal for sun/UV protection, airflow & where fixed arms or guides are not suitable.

It is the perfect awning selection if posts, pillars or walls are not available for the installation of guides.

The straight drop window awning is the only window awning style that can be used for both window awnings or as a cost effective alfresco awning.

Straight drop awnings are locked into position with our dog clips & saddles or straps & saddles are used to secure the awning in place.

Our straight drop window awning can also be used as a cost effective alfresco awning. A hood is used instead of a headbox & a different base rail to the straight drop alfresco awning.

STRAPS & SADDLES

- + Dog Clips & Saddles
- + 350mm Straps & Saddles
- +450mm Straps & Saddles
- +750mm Straps & Saddles

Select Window Awning Finish

Choose from our range of finishes such as the contemporary bottom rail or opt for a straight or the more traditional scallop finish.

FINISH OPTIONS

- + Exposed Bottom Rail (no flap)
- + Scallop Flap with Bias
- + Straight Flap Hemmed (no bias)
- + Straight Flap with Bias

Select Window Awning Operating Options

Our window awnings have been developed to offer maximum flexibility for operation.

AUTOMATION*

With a touch of a button watch your awnings lift & lower from inside your home. Our motors are developed with several settings which can be engaged or turned off at any time. They include a tension setting so your awning can be tort once fitted off, an impact setting to prevent objects from damaging the awning or motor whilst in motion & a favourite position so with a touch of the button all awnings will raise or lower to this same position. Our solar-powered ARC Wind & Sun Sensor naturally reacts to the elements to automatically open or close an awning, always providing a comfortable external environment or protection of the awning. With our Pulse Hub you can enjoy sophisticated window covering control using 'Remote Control' app via your smart phone or tablet, or voice control through your smart device. View our automation brochure for more information.

SPRING OPERATION

Easy to use spring operation where by the awning is constantly under tension & requires, clips, straps, automatic arms or to be tiered off to prevent the awning rolling up.

MANUAL CRANK OPERATION*

The manual crank operation is designed to take the weight out of lifting the awning. The crank gears have a ratio of 3.6:1 & 6:1 making it easier for any age person to lift & lower their awning.

Zipscreen is the ultimate external screening solution for any outdoor area

Privacy & protection all year round, Zipscreen keeps you shielded from the elements & insects, regardless of the season. Whether it be an alfresco, pergola, or veranda, Zipscreen is the perfect addition for any outdoor entertaining area.

Your custom designed system can be made in widths up to 5.5 metres offering you an external solution to fit almost any area.

Hidden z-LOCK Technology

Breakthrough z-LOCK technology provides a unique fabric guide, fastening & securing the welded zip & fabric concealed within the side channels; creating a strong, smooth & streamlined system.

The hidden z-LOCK function ensures no gap between the fabric screen & side channels & a secure guided movement that won't blow out in the wind.

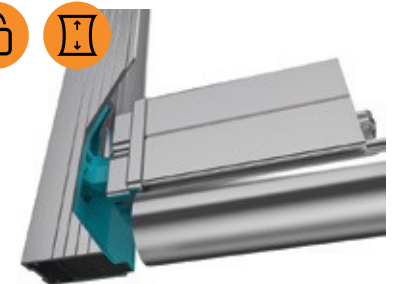

A total seal provided by Zipscreen's z-LOCK technology & bottom sealing strip aids in creating a relaxing insect free environment.

One Action Ultra-Lock & Tension

Invisibly integrated, Ultra-lock's patented technology seamlessly reinforces your Zipscreen, for reduced movement & an ultra-smooth fabric finish.

Our Ultra-lock perfectly secures your Zipscreen automatically, without an external lock or latch, & utilises an in-built, self-correcting system, to ensure your screen evenly clicks in place. Ultra-durable. Ultra-reliable. Ultra-Lock.

Easy to use Latch-Lock

Latch-Lock utilises a spring pin system. When the awning is pulled down it will automatically clip into the latch & lock off. To unlock the awning, each pin can be released & the awning can be raised up.

Headbox options

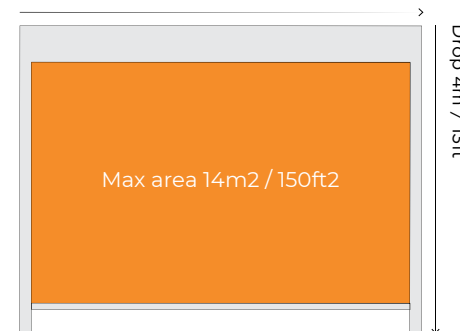

Keeps the fabric clean from rain, UV & dirt, enhancing longevity.

Increased air circulation around the roller.

Capacity

Width 5.5m / 18ft

Operating options

Spring operation or easy to use automation with the option of remote, app or voice control, & solar-powered Wind & Sun Sensors to naturally react to the elements & automatically open or close your Zipscreen.

Alfresco Awnings

Keep the sun, wind, rain & insects out of your outdoor living area.

It's never been so easy to create a space that can be enjoyed 365 days a year than with our range of alfresco awnings.

Creating an all-inclusive outdoor room not only offers privacy & sun protection but wind, rain, dust, dirt & insect protection.

Designed in Australia, our alfresco awnings are a modern awning system suited to all exterior buildings.

Our alfresco awnings are proven to reduce cooling energy costs by up to 60%*

Our alfresco awnings have been independently tested & proven to significantly reduce cooling energy costs by keeping a standard* home at a consistent & comfortable temperature throughout the summer months.

Wind Load

Awnings have been tested to comply with a Class 3 level of Wind Resistance under European standard EN13561: 2009 - 01.

Select Alfresco Awning Style

Mix & match the awning styles whilst still maintaining a consistent appearance for your home. All 3 awning styles within the range use common hardware for a consistent appearance irrespective of which awning style you choose. Personalise the perfect awning to suit your external shading requirement.

CABLE GUIDE

Industrial look allowing privacy & ventilation.

SIDE RETENTION SYSTEM

Ideal for windy areas. Encloses an outside area, with no gaps for dust & dirt to enter.

STRAIGHT DROP

Sleek & simple with a modern aesthetic.

BOTTOM RAIL END CAPS

By floating in & out of the bottom rail the awning operates smoothly without putting pressure on the cable.

Cable Guide Alfresco Awning

A great contemporary straight drop option for sun/UV protection, air flow & where channels are not suitable.

The cables are high tensile 2.5mm 316 grade marine stainless steel, making them perfect for coastal applications.

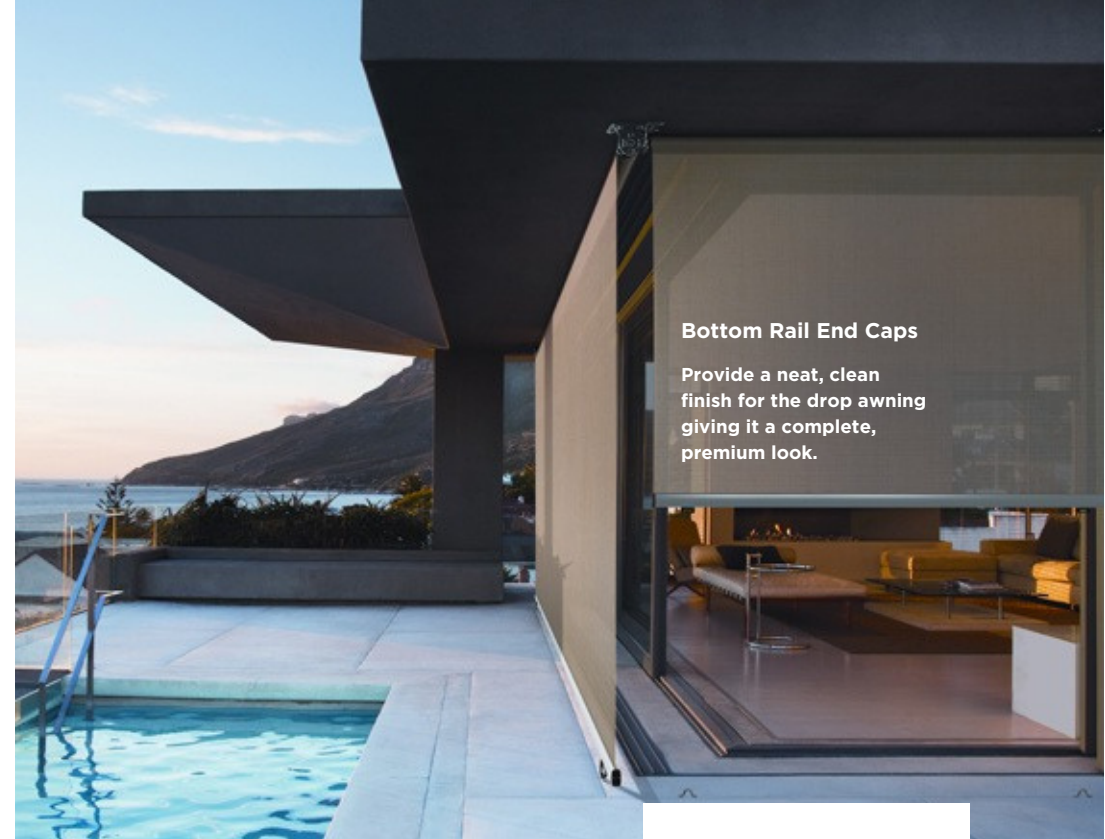

Side Retention System (SRS) Alfresco Awning

A option ideal for sun/UV protection, insect resistance, windy applications, enclosing a balcony or outdoor entertaining space plus creating privacy.

The fabric is tensioned by utilising a floating channel, located within the special two piece side channel, eliminating the possibility of fabric “blow outs” or light gaps.

Light lifting operating option with SRS

Allows you to raise & lower the awning to any desired position by simply moving the bottom rail by hand. The internal smooth spring mechanism provides you with lightweight & effortless operation without resistance.

Bottom Rail End Caps

Provide a neat, clean finish for the drop awning giving it a complete, premium look.

Hold Down Straps

Can be used to hold down the awning at various points across the bottom rail & assists in minimising bottom rail movement in stronger winds.

Straight Drop Alfresco Awning

A traditional awning style that uses no guides making it ideal for sun/UV protection, air flow & where channels are not suitable.

The open roller is a modern industrial look with exposed componentry as it is available with or without a headbox.

Select Alfresco Awning Headbox Options

For a modern contemporary look, our alfresco awnings offer two designer headbox options.

CLOSED HEADBOX

Keeps the fabric clean from rain, UV & dirt enhancing longevity.

OPEN HEADBOX

Increased air circulation around the roller minimising heat build up for PVC skins.

OPEN ROLLER

A modern industrial look & is the ideal choice to reduce costs.

Select Alfresco Awning Operating Options

Our alfresco awnings have been developed to offer maximum flexibility for operation.

LIGHT LIFT

An innovative operating option allowing you to raise & lower the awning to any desired position by simply moving the bottom rail by hand.

STANDARD SPRING OPERATION

Allows you to manually adjust the height of the awning & secure using either the sliding bolt system or hold down clip option.

AUTOMATION

Using the best of technology & design, control your awning with a touch of a button. Choose from our range of motorisation solutions including tactile remotes, app or voice control, & solar-powered ARC Wind & Sun Sensors.

MANUAL CRANK

The geared crank ensures easy operation that is not dependent on your strength.

Select Alfresco Awning Bottom Rail Accessories

The alfresco awning bottom rail holds the fabric taut & minimises any movement in windy situations. Designed with a subtle modern curve, it seamlessly blends with the headbox aesthetics.

WEIGHT BAR

An additional weight bar can be inserted into the heavy duty bottom rail. This is beneficial for smaller awnings that require additional weight to reduce bottom rail bounce & increase fabric tension.

LOCKING BOLT

Secures the awning into the universal floor mount bracket or locks off your SRS awning at the lowered position.

HOLD DOWN STRAP

Hold down straps can be used to hold the awning down at various points across the width of the awning. Similar to the locking bolts, the hold down clips insert inside the bottom rail for a clean bottom rail finish.

Pile Brush & Valance

The floor surface is often not perfectly level. When an awning is installed over a wide width there will be room for light gaps, insects, debris, wind & rain to enter.

With the ability to insert either pile brush or a fabric valance, this gap can be eliminated therefore maximising the functionality of the awning. These inserts also protect the bottom rail from chipping if dropped to the ground quickly.

Automation

Our Automate external motor is tailored for our window awnings, Zipscreen awnings & alfresco awning ranges, offering a reduction in time & effort normally required for the operation of outdoor window coverings, extending comfort & convenience outdoors. The awning motor gets connected to power, so with a permanent power supply there is no need to recharge.

Your awnings can also be conveniently controlled by either using our Automate controllers including remote or right from your smart phone via our Pulse Hub. Control all of your interior & exterior window coverings via the one control.

SMART PHONE CONTROL

For effortless & luxurious outdoor living, pair your motorised awning with our Automate Pulse Hub & enjoy sophisticated control straight from your smart phone whether you're home or away. Set automatic timers or smart scenes & experience a new level of convenience.

VOICE CONTROL

Life can get in the way sometimes, so if you're too busy preparing for the things that matter, simply ask Google, Alexa or Siri to take control of your outdoor awnings. A simple voice command can raise or lower your outdoor window coverings so you can keep your hands free for everything else.

SOLAR POWERED WIND + SUN SENSOR

Wind & Light Power Storage LCD Display Measurements Capacitor

Our solar-powered ARC Wind & Sun shade increasing. You can be rest assured Sensor naturally reacts to the elements knowing that your motorised awning, to automatically open or close an awning, connected to our sensor, will activate the always providing a comfortable external awning to close achieving the optimal level environment or protection of the awning. of shade. This occurs when a pre-set lux Imagine entertaining outdoors on a bright level is reached, signally to the awning that sunny day, the sun intensity & need for it needs to open & provide shade.

Select Fabric

For sun control and style, our outdoor fabrics are the perfect choice when it comes to blinds and awnings. Our large range of mesh fabrics includes a selection of colours inspired by Colorbond® which means you can match to any existing outdoor theme.

As there are several fabrics to choose from keep below in mind to select the right fabric to suit your outdoor requirements.

Privacy & View Through

There are open & closed weave awning fabrics. Consider if you want day or night time privacy. An open weave fabric in a dark colour gives fantastic view through in the day, but also allows others to see in at night.

Durability

Be mindful that when a fabric is used outdoors it is exposed to the elements. Our fabrics with DURAGUARD® Fabric Protector effectively repel most stain causing agents with its proven, water based, preventative formula. This fabric protection is totally invisible + has high levels of stain repellence. It makes cleaning + maintaining the fabric so much easier.

Air Flow

Clear PVC is great for unrestricted view through & when air flow is not required. If you are enclosing a verandah or patio, consider if you still want to have a nice cool breeze coming through. If this is required, ensure you select our open weave fabric with around 5% openness.

Colour Fastness

Ensure the fabric you choose has excellent fade resistance to the sun. Our fabrics are tested to resist fading to ensure your awnings remain the colour you selected for many years to come.

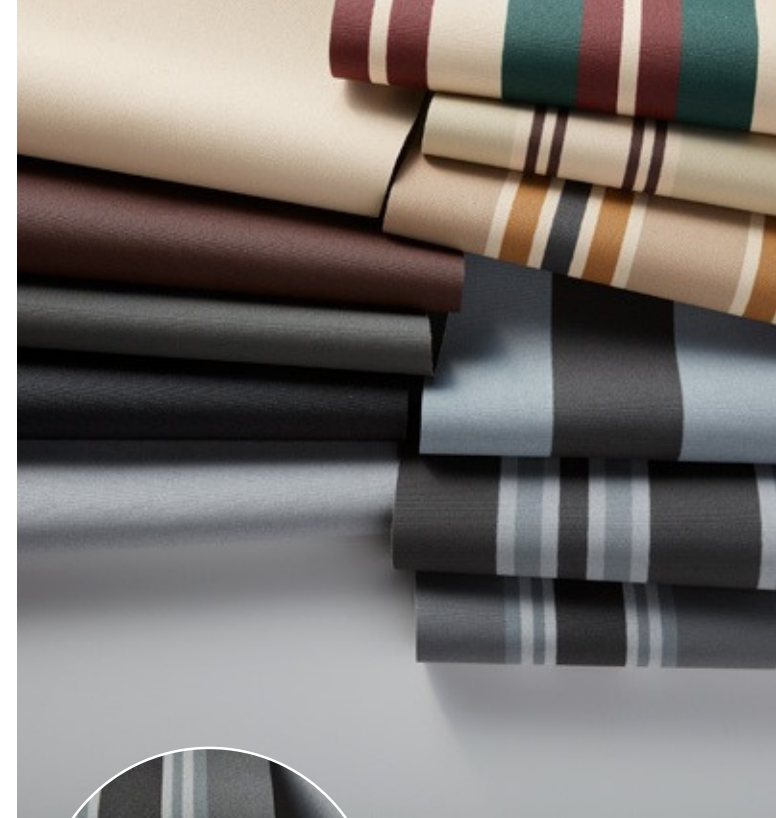

FIVEyear
WARRANTY

Microban
antimicrobial product protection

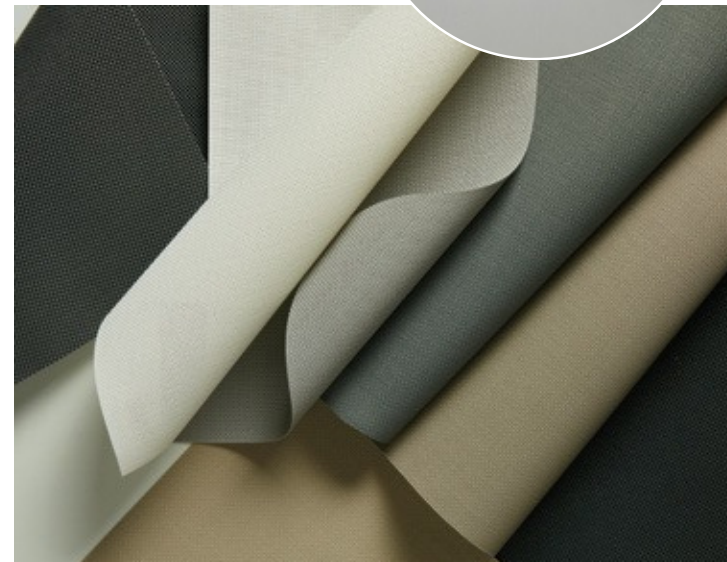

Children & Schools
GREENGUARD
Indoor Air Quality Certified

FIRERETARDANT

LEADFREE

Our outdoor fabrics are manufactured to withstand the harsh Australian climate with fade, water, mildew & UV protection. Fire retardant fabrics are also available.

Mesh

Modern breathable mesh is a perfect choice for a mix of air flow & privacy.

Mesh fabric is available with an approximate shade cover of 95% with a 5% openness factor. This is ideal for providing protection from the sun whilst allowing you to enjoy your views. If you're looking for increased privacy then opt for our mesh fabric with an approximate shade coverage of 99%. With its blackout coverage it will also aid to block out views & increases your wind & rain protection.

The innovative Mode Zero fabric is a modern alternative to canvas. The first true 100% blackout mesh it provides complete privacy & sun protection with its zero % openness, & with a wider width of 320cm, Mode Zero also allows for less fabric joins with most windows.

Clear PVC

Ideal for a weather proof outdoor entertaining area or living space, keeping the heat in during winter & stopping the wind blowing through. Clear PVC allows you to enjoy the benefits of uninterrupted views, all year round.

Our PVC fabric is sourced directly from Japan & has been tried & tested for over 40 years. Specially formulated for Australian conditions it comes with UV-R Blockout from 92-98% & is dimensionally stable to reduce shrinkage & expansion from the elements.

Canvas

Ideal choice for complete 100% UV Blockout, choose from a range of widths in plain, self striped & coloured stripe designs.

Acrylic

The versatility of 100% Acrylic makes it suited & recommended for folding arm awnings, hoods & canopies.
